Re: Web Developer

Dear Mr./Mrs.

I am writing to express my great interest in applying for the Web Developer since I have been passionate about web development since high school. I believe that I can meet all your company requirements for the position and contribute excellent value during my working time.

As a 3rd-semester Computer Programming and Analysis student at Seneca College, I am proficient in various programming languages, programming patterns, database structure, tools, and operating systems. Moreover, thanks to the covid time, I have had time to self-learn in web development for 2 years and gained lots of proficient knowledge in both front-end and back-end frameworks such as React, Redux, NodeJS, and ExpressJS. I also gained the ability to update recent frameworks by myself through official documents and YouTube videos.

I have always been interested in working as a Web Developer in a professional working environment. Therefore, I have joined the VAS (Vietnamese Association at Seneca) web team to gain practical experience in developing projects that would enhance my teamwork and organizational skills in professional environments. My teammates and I are working together through Github to maintain the existing VAS group website and develop a professor review website. Besides that, I also sharpen my skill by developing personal projects using different web technologies in my free time. Recently, I have developed a PERN stack using PostgreSQL, ExpressJS, React and NodeJS tutor website that allows students to book and review a peer tutor. I also have deployed some of my projects to Heroku, Vercel and Github Pages for practical experience. For example, I have a React blackjack game on Vercel that allows a user to compete with the computer and cover all possibilities of result of a round.

With my own values aligning well with your organization's views, I believe that a collaboration between us will prove to become a valued opportunity. I appreciate your time to review my resume, and I look forward to an interview. Thank you for your time and consideration.

Sincerely,

Vivy Vuong
